Amendment to the Specification

Please replace the paragraph at page 20, lines 15-18 with the following amended paragraph:

Art Unit: 2161

This formula provides one of the mathematical foundations for the comparison algorithm. For the description of a number of similar algorithms, see, e.g. M. J. Atallah, F. Chyzak, P. Dumas, "A Randomized Algorithm for Approximate String Matching"; <http://algo.inria.fr/dumas/At-ChDu99/>.

Allowable Subject Matter

Claims 1-16 are allowable over the prior art of record, renumbered (order) as claims 1-16, respectively.

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable because the prior art of record or that encountered in searching for the invention, fails to disclose or suggest a method for determining a similarity between two documents stored in a digital format in a data processing system by combining sets of coefficients for each document into coefficient clusters for each document, a coefficient cluster containing coefficients which are similar according to a predetermined similarity metric, and evaluating a degree of similarity between the two documents by counting coefficient clusters into which chunks from both documents fall, as claimed in addition to the other claim provisions.

Claims 2-16 depend from claim 1, and are therefore allowable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to illustrate the state of art with respect to evaluating a degree of similarity:

U.S. Patent No. 6,804,670 of Kreulen et al.

Art Unit: 2161

U.S. Patent No. 6,119,124 of Broder et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
